

general	
accu type	AA
kind	Ni-MH
voltage	1,2 V
rechargeable	up to 1000 cycles
physical description	
dimensions	approx. 14,3x50,4 mm
weight	approx. 29 g
box	
blister	2/4 pcs

Technical details might differ from those written above without previous notification.

## Inifnity Xtreme

INFINITY-∞+

Xtremely long-lasting power source for high-drain devices!

The high quality of the Infinity accumulators, confirmed by the independent Central Laboratory of Batteries and Cells makes them the best alternative not only to disposable batteries, but also to rechargeable batteries of other brands.

They have no negative memory effect and are environmentally friendly (batteries contain no cadmium). PENTAGRAM Infinity accumulators do not carry so called "memory effect" which means they can be charged at any time without loss of capacity (they do not have to be totally discharged before charging). Long-lasting PENTAGRAM accumulator can be recharged up to 1000 times.
