

**PIN YOUR DATA!**  
 Protect your data with  
 a **4-digit PIN** code  
 and hardware **authorization!**

#### technical data

memory type	Flash Dual Channel
capacity	512 / 1024 / 2048 MB
interface	USB 2.0
dimensions	78x53x8 mm
weight	38g
other	4 digits hardware PIN code autorisation

#### Software:

- SecureAP
- Make Bootable
- PC Lock
- Pen Mail
- Secret ZIP

#### requirements

port type	
system	USB 1.1 or 2.0 PC or Macintosh with USB port

#### technical support

technical support	phone, e-mail, www
warranty	24 months

#### box contents

1. PinCode+
2. Etui
3. Drivers & software CD

Technical details might differ from those written above without previous notification.

# PENTAGRAM

*PINCode+*

The security mechanism is a hardware based system making the drive immune to any software breach. In addition, unauthorized users are limited to only five attempts at the password before the drive locks down, preventing them from continuously trying to guess at the password. Only a special "rescue code" can reverse the lock down state. Unlike normal software or fingerprint encryption, PENTAGRAM PinCode further prevents the risk of purposely breaching and false or inconsistent recognition while providing reliable backup solution for its users.

Performance Value & Price Position The PENTAGRAM PinCode is compatible with Windows, Mac and Linux systems. Maximum 2GB capacity and USB2.0 high speed store and transfer large files like photos, images, music, films and important presentations without any lag. Among other hardware based flash storage devices with security function like fingerprint identification, PENTAGRAM PinCode is only half the price yet with higher performance and greater value to its owner.

Capacity		
512 MB	1 GB	2 GB
